

EXCELSIOR Electric city bike "Pearl" Mod. 22

wave, 28", ocean blue, 8-speed SHIMANO "Nexus" freewheel disc, 50 cm

RRP: €2,999.95

Clean & orderlyWhen small changes make a big difference, the designers from EXCELSIOR have done everything right. The popular "Pearl" model still shines in a clean and uncluttered look, but the appearance is again clearly underlined by the battery placement - no longer vertically, but horizontally framed in the down tube, the e-bike looks much slimmer than before when viewed from the side.The BOSCH "Active Line Plus" motor blends harmoniously into the aluminum frame in the bottom bracket area. When pedaling, the mid-engine supports up to 25 km/h. At first rather gently, then later - at higher speeds - it shows its true power. It is also pleasantly quiet in operation. Its four support levels can be controlled from the clear "Intuvia" display.The fine tuning takes over the durable and low-maintenance SHIMANO "Nexus" internal gear hub with eight gears. The brakes are just as sensitive as the engine. The hydraulic disc brakes "MT 200" also from SHIMANO can also really bite, but above all they convince with their easy operation.Last but not least, the frame determines the driving style. As torsionally stiff as it is, the Pearl also rides sportily - if you want. Above all, however, it determines the upright riding position and is supplemented by the everyday equipment that allows the city bike to be ridden every day on all occasions.
