

CONWAY Electric SUV "Cairon SUV 5.0" Mod. 22

diamond, 29", red metallic / black metallic, 11-speed SHIMANO "Deore", 57 cm / XXL

RRP €3,999.95

The SUVs from CONWAY combine off-road capability and best control with exciting riding and comfort. For even more riding fun, the developers have upgraded the "Cairon SUV 5.0" with a more powerful motor as well as the longest range BOSCH "PowerTube" battery, which is fully integrated into the frame. The support can be easily divided up to 25 km/h with the four support levels of the powerful BOSCH "Performance CX" motor and the 11 gears of the SHIMANO "Deore" derailleur. The 750 Wh battery can either be removed downwards for charging or you can simply leave it in the frame and charge it via the charging socket on the left side of the frame. For enjoying best performance and high comfort on unpaved roads, the 58 mm wide CONTI tires are finely profiled and, together with the 120mm suspension fork from SUNTOUR, also cushion the surface of dirt and forest roads such as cobblestones well. The hydraulic disc brake from TEKTRONIX (disc diameter front and rear: 180 mm) is there for the necessary safety both in fast downhill rides and in city traffic. The braking power can be finely dosed, but it does not let you down when it comes to it spontaneously. Thanks to mudguards and light system, any tour in any weather with the "Cairon SUV 5.0" can be extended until late in the evening.
