RRP €1,049.95

For simple, uncomplicated MTBsUncomplicated and without a lot of frills - that's what KAYZA hardtails are all about. With the "Garua 10", this claim is particularly noticeable in the gearing. The "SX Eagle" 12-speed drivetrain is the solid entry into SRAM's MTB world and only has one chainring for easy handling. The wide-spaced cassette stands for the tidy look, which has also been taken a step further with the new cable routing. All cables now run through the aluminum frame.With the 29er wheels and the grippy SCHWALBE tire mix, the bike impresses on the trail with the best rollover characteristics and permanent ground contact. "Rapid Rob" tires are fitted at the rear and "Tough Tom" tires at the front - both 57 mm wide. Thanks to low rolling resistance and low weight, you can pick up the pace. In combination with the SUNTOUR air Suspension Fork, they bar tree roots, potholes and anything else that comes in front of your tires. The Fork can be individually adjusted to your body weight so that it can deliver its full performance.If you want speed, you also need reliable brakes. That's what the hydraulic Disc Brakes from SHIMANO are for. Finely adjustable on long descents, spontaneously powerful when necessary. Exactly what you need on varied tours - the essentials in view.
