RRP: €729.95

A Clean Look Meets PracticalityWith a redesigned frame, the tried-and-true “Spodic 6” kicks off the new cycling season. The developers at KAYZA have come up with something new for this hardtail: internally routed cables. This not only gives the bike a clean look—this makeover also offers practical benefits. The cables are better protected from the elements, as well as mud and dirt. The advantage: wear and tear takes longer to set in.With its 27.5-inch wheels and sporty frame geometry, this hardtail accelerates quickly and handles sharp turns with agility. The SHIMANO “Deore/Altus” drivetrain, with its 27 gears, provides the power, while the SUNTOUR Suspension Fork smooths out the terrain. The SHIMANO “MT-200” hydraulic disc brakes are reliable—they don’t lose power even in wet conditions.The KENDA tires, with their fine tread, are designed for field and forest trails. They grip firmly in loose soil while rolling smoothly on asphalt. With these features—and a fork that can also be locked out—the “Spodic 6” is also perfect for daily city rides.
