

## KAYZA Electric trekking bike "Tanana Dry 3" Mod. 22

wave, 26", purple green / silver, 8-speed SHIMANO "Nexus", 45 cm / S

**Price: €1,840.00**

For meandering through hilly terrain "Tanana" means "mountain river" in the indigenous language family of North America - and just like a mountain river, you can also meander through hilly terrain on KAYZA's "Tanana Dry 3". The harmonious "Active Plus" BOSCH engine propels you forward at up to 25 km/h to ensure the right flowing speed. It is powered by the 400 Wh Battery, which is located on the seat tube for a low center of gravity. The e-trekking bike is comfort-oriented right from the start with its wave frame and low step-through. Once you are seated, you automatically adopt an upright riding position, which is dictated by the geometry. For fine-tuning, you can easily adjust the angle-adjustable Stem - just as you please. For even more comfort, the e-bike is equipped with a Suspension Fork from SUNTOUR. It can be individually adjusted to the rider's weight - then it does its best to smooth out off-road and cobblestone bumps. The tires also work well on asphalt or cobblestones as well as on dirt roads. Whether in the city or on long descents, the "BR-MT 200" hydraulic Disc Brakes from SHIMANO are powerful even in wet conditions and can be operated smoothly at all times. There is also a coaster brake. With long Fenders, bells and the Carrier as well as all Reflectors and the bright LED Light, the "Tanana Dry 3" is completely suitable for everyday use. Its suitability for touring is rounded off by the SHIMANO "Nexus" derailleur gears, which with their 8 gears also provide a solid range for hilly terrain.
