

Continental Tube "MTB 27,5"

Sclaverand valve 42mm, workshop package, delivery only in full PU (50pcs.), bulk

Price: €2.86

CONTINENTAL MTB 27.5 If your bike has a flat tire on the road, you won't be able to get any further, so it's best to take a suitable spare tube with you. This way you can continue riding soon and patch the defective tube during your break or later at home. You can usually tell which tube you need from the sidewall of the tire. The so-called ETRTO dimension can be found there. The first two digits indicate the tire width, the following digits the wheel diameter. The MTB 27.5 from CONTINENTAL is suitable for a wide range of tires for 27.5" (650b) wheels. Incidentally, the Sclaverand SV valve on the MTB 27.5 is 42 mm long.
