

FalisoMED Handicap Cycling- Help Device "400"

left

Price: €217.99

Cycling with a prosthesis or completely stiff legThe FALISOMED Handicap Cycling- Help Device "400" is a device for people with a stiff leg on a conventional bicycle. The stiff leg stands on a footrest. The pedal on the other side is operated normally by the healthy leg, as a ball-bearing return device with a Spring automatically returns the Crank Spider to the correct position. The aid is available for bikes with seat tubes of different sizes. A square bottom bracket is a prerequisite for mounting.
