

GAADI Tube

Dunlop valve (DV), 40mm

RRP: €11.99

Not everything has (only) one end GAADI is revolutionizing Tube changing: You will never have to remove a Wheel again to change a Tube. How is that possible? A GAADI tube is not a closed circle like other bicycle tubes, but has an open design. This means you can simply place it inside the tire all the way around. To make threading even easier, GAADI has placed the valves in the first third of the tube. In addition to saving time, this type of installation has the advantage that you hardly need any tools. A small, lightweight tire levers is all you need to change the tube. GAADI tubes are made of durable butyl and are just as light as conventional bicycle tubes. The new tubes are available in 20, 24, 26, 27.5 and 28". They are available with AV, DV or SV valves, whereby the SV valve is designated FV at GAADI. High rim flanks have also been taken into consideration, so tubes with 47 mm valves are also available.

Basic Data

Supplier Article Number:	510317010111
EAN	8593375436564
MSRP:	€11.99
Bidex-Code	204050
SB-Article	No
DST-Code	2A01
Fedas-Code	160477
Brand/Supplier	GAADI
Unit of measure:	PIECE
Weight	0.228 kg

Technical Data

Article type	Tube
ETRTO	40-559 , 47-559
Main colour	black
Valve length	40.0 mm
Valve type	Dunlop (DV)
Variant	Article
Wheel size	26 "
Width in inch	1.50 , 1.75
