

GAADI Tube

Dunlop valve (DV), 40mm

RRP: €11.99

The right solution for puncturesOne thing is clear: when cycling, hardly anyone wants to spend their valuable time repairing tires. In this respect, the company GAADI from Mönchengladbach has come up with a revolutionary bicycle inner tube.It is a tube that saves you having to remove the wheels. What sets the GAADI tube apart from other bicycle tubes are its 2 ends, which touch each other in the tire when inflated. This creates a seamless connection.This saves a lot of time with GAADI. Perhaps even more importantly, however, it also keeps problems at bay. After all, the tube can be fitted even if you don't have the right tools to remove the bike. With the GAADI tube, it is not necessary to remove the Wheel. You only need to remove the tire from the rims on one side of the Wheel.The rest works as usual when changing the tube: you insert the GAADI tube, plug the valve into the valve hole and secure it with the nut. The Tube is then lightly pumped and the sleeve is pulled back onto the rim. Finally, you finish pumping the tube and you're ready to go.The tube is available in all common sizes between 20" and 29" and with all valve types.

Basic Data

Supplier Article Number:	510317016111
EAN	8593375436687
MSRP:	€11.99
Bidex-Code	204050
SB-Article	No
DST-Code	2A01
Fedas-Code	160477
Brand/Supplier	GAADI
Unit of measure:	PIECE
Weight	0.199 kg

Technical Data

Article type	Tube
ETRTO	32-622 , 32-630 , 32-635 , 37-622
Main colour	black
Valve length	40.0 mm
Valve type	Dunlop (DV)
Variant	Article
Wheel size	27 " , 28 "
Width in inch	1 1/2 , 1 1/4 , 1 3/8 x 1 5/8 , 1 5/8 x 1 1/4
