

Tires "Tuscany"

50-507 (24" x 2,00), 790g

Price: €9.99

One less thing to worry about thanks to puncture protection coating Nobody likes punctures. This makes it all the more important that puncture-proof bicycle tires prevent them. But not all puncture protection is the same. The HARTJE "Tuscany" tire is an extremely popular and affordable entry-level model that offers solid protection in terms of its TPI value. This value refers to the number of nylon threads on one square inch of tire carcass. The higher the TPI value, the better the tire is protected against puncturing or tearing. However, the threads also ensure a higher weight and a certain stiffness. It is therefore important to find exactly the right balance here. With a value of 22 TPI, the puncture-proof "Tuscany" bicycle tire is at Protection Level 1. This all-round tire performs well everywhere, whether on gravel or sidewalks, on asphalt or forest paths. With a weight of 790 g, the tire is ideally equipped for these requirements. The HARTJE "Tuscany" tire with black rubber and wire as well as highly visible Reflective Stripes is suitable for touring and city bikes and is also suitable for e-bikes up to a speed of 25 km/h. The HARTJE "Tuscany" tire is an all-round tire for city and country use that scores points with many cyclists thanks to its puncture protection and particularly long durability.

Basic Data

Supplier Article Number:	490070
EAN	4250311339344
MSRP:	€21.95
SB-Article	Yes
DST-Code	2A02
Fedas-Code	160471
Bidex-Code	204040
Brand/Supplier	coming soon
Unit of measure:	PIECE
Weight	0.79 kg

Technical Data

Design	clincher tires
ETRTO	50-507
Features	reflex
Main colour	black
