"Green" on the roadUrban, individual and dynamic: The newly revised "Road Cruiser" from SCHWALBE impresses with its appealing tread design, which enables low rolling resistance. There is a choice of numerous color variants in sizes from 12" to 28". However, the outstanding feature of the "Road Cruiser" is in the tread and is called Green Compound. This is a rubber that is made from renewable and recycled raw materials. It is so good that SCHWALBE has been able to use it in a conventional bicycle tire for the first time. Green Compound is only available in tire versions with a black tread.
