The No. 15 from SCHWALBE If you have a flat tire on the road, you won't get any further. That's why it's best to take a suitable spare tube with you on your bike tour. That way, you can continue riding soon and patch the defective tube during the tour break or later at home in peace. The ETRTO dimension is marked on the side of the vast majority of tires. The first two digits display the tire width, and the following digits provide information about the inner diameter of the tire. Tube no. 15 is the correct tube for numerous widths of 27" and 28" tires. The length of the Blitz DV valve is 40 mm.
