RRP €8.90

Tube no. 17 from SCHWALBE if you have a flat tire on the road, you won't get any further. That's why it's best to take a suitable Spare Tube with you on tour. This way you can continue riding soon and patch the defective tube during the break or later at home. The ETRTO dimension on the side of the tire provides information about the appropriate tube. The first two digits before the dash indicate the tire width in mm, the digits after the dash indicate the inner diameter of the tire, which is 27" and 28" for the No. 17. The No. 17 has a 50 mm long Sclaverand SV valve.
