

SCHWALBE Tube "Nr. 19"

Dunlop valve (DV), 40mm

Price: €3.13

The No. 19 from SCHWALBEA bike without a tube is possible, but not rideable. That's why you should always have a spare tube with you when you're out and about. Please make sure you have the right size! The correct size is usually displayed on the side of the tire. The ETRTO measurement is commonly used. Its first two numbers indicate the correct tire width. The following digits indicate the inner diameter of the tire. For No. 19, this is 27.5" (650b) and 28". Incidentally, the Blitz DV valve on No. 19 is 40 mm long.
