

Snell Battery Protection

for frame battery

Price: €12.99

For a well-functioning Battery For a well-functioning Battery The universal SNELL Protective Cover for batteries provides all-round protection against low temperatures, dirt and stone chips. Its use is recommended to minimize the temperature fluctuations to which the battery of an e-bike is exposed. After all, constant high temperature fluctuations can reduce the service life and capacity of a battery. During the cold season, Battery Protection helps to keep the Battery from heating up. As a result, the operating temperature is higher, giving you a greater range. In addition, the cover protects the housing of the batteries from scratches or shocks when the battery is stored or transported. The cover is made of high-quality neoprene and therefore adapts ideally to the shape of the battery. Battery Protection is available for Frame, Carrier and Down tube batteries. While the covers for Frame and Carrier batteries are suitable for models from Bosch, Shimano, Yamaha, Bafang and other similar models, the protection for down tube batteries is a universal model. The version for down tube batteries has the following dimensions: 44 cm long underside, 54 cm long top side. The recommended circumference of the batteries is 29 to 38 cm.

Basic Data

Supplier Article Number:	1114
EAN	4260416641037
MSRP:	€25.95
SB-Article	Yes
Fedas-Code	160911
DST-Code	2N12
Bidex-Code	301940
Brand/Supplier	Snell
Unit of measure:	PIECE
Weight	0.055 kg

Technical Data

Compatibility	Bafang , Bosch , Shimano , Yamaha
Components	Akku
Design	part protection
Features	durable , frost resistant
Main colour	black
Variant	Article

Vehicle type

bike
