

CONTEC Dynamo "DL-120"

right mount

Price: €4.49

Always in the best light Reliable lighting is a must for all bikes that are used in road traffic. The CONTEC "DL-120" Dynamo in a robust, black plastic housing is suitable for left-hand mounting and offers a reliable Power Supply on all city or touring bikes with halogen or LED lighting. The 4 plug connections (2+/2-) always ensure first-class contact: the insulated cable ends are simply inserted into the removable plugs and plugged into the corresponding mounts. This ensures that the cables are firmly connected to the Dynamo and protected from oxidation caused by external environmental influences. The Dynamo is suitable for a 6 V and 3 W lighting system and is equipped with an Overvoltage Protector to protect the light bulbs. It is conveniently operated via a smooth-running release button. Thanks to its high-quality workmanship and easy handling, the CONTEC "DL-120" Dynamo is particularly suitable for mounting on all city or touring bikes with LED or halogen lighting.
