

CONTEC Stem "Tarantula" 1 1/8"

90mm long, handlebar clamp, silver

RRP: €29.95

Ergonomics in focusAs the connection between the handlebar and the fork, the stem is a small, but very important part for a back-friendly posture on a bike. The CONTEC "Tarantula" stem allows for a high level of riding comfort for beginners and experts.The handlebar stem carries a substantial part of the weight of the cyclist, especially when pedalling out of the saddle. Thanks to a high-quality material composition, it fulfils this task excellently. The lightweight aluminium 6061 is combined with stainless steel bolts. This means that the cold-forged stem is optimally equipped for any load.The removable faceplate stem "Tarantula" is clamped to the steerer tube with a 40 mm stack height and is an Ahead stem. This essential component by CONTEC is available for 1 1/8" (28.6 mm) fork steerer tube diameters. The 4 bolt clamps for easy installation are included in the scope of delivery.This high-quality handlebar stem is particularly striking because it is individually adjustable. In a range of -30 to +40°, it meets the rider's personal needs. This makes it possible to adapt to body shape or riding style, as well as to adjust for an ergonomic posture. Last but not least, it looks great: The CONTEC handlebar stem is available in black and silver. Each cyclist can therefore decide whether this adjustable aid embellishes their bike in a subtle and sleek or in a shiny way.

Basic Data

Supplier Article Number:	JD-ST103
EAN	4250311318646
MSRP:	€29.95
SB-Article	Yes
Bidex-Code	205020
DST-Code	2B02
Fedas-Code	160224
