

CONTEC Brake Inner Cable "Stop"

PreLube, galvanized

RRP: €3.95

Good gliding properties for high braking performanceIntact brake cables mean good responsiveness and modulation of V-brakes, cantilever and side-pull brakes. For this reason, attention should also be paid to the quality of the brake cables when overhauling the brakes.The CONTEC Brake Inner Cable "Stop" made of galvanized steel with PreLube is particularly smooth-running and insensitive to corrosion caused by moisture. The universal inner cable is equipped with a pear nipple and a barrel or roller nipple and, with a diameter of 1.5 mm and a length of 2 m, is suitable for all standard cable brake systems.The scope of delivery also includes an End Cap, which is simply plugged onto the cut end of the Brake Inner Cable and pressed together. This effectively prevents injuries and fraying of the cable end.Due to its universal usability for all common brakes and its good sliding properties and corrosion resistance, the CONTEC "Stop" Brake Inner Cable should not be missing from any toolbox.

Basic Data

Supplier Article Number:	W7138
EAN	4250311341118
MSRP:	€3.95
Fedas-Code	160354
SB-Article	Yes
Bidex-Code	202160
DST-Code	2R08
Brand/Supplier	CONTEC
Unit of measure:	PIECE
Weight	0.027 kg

Technical Data

Cable	2000 mm
Design	Brake
Diameter	1,5 mm
Main colour	silver
Variant	Article
