

CONTEC Saddle "Volare Trekking XL"

unisex

RRP €34.95

Comfortable & wide for connoisseursComfort in all seating positions and that with a larger width: CONTEC has designed the "Volare Trekking XL" for particularly comfortable riding experiences.In order to guarantee maximum comfort for each position, this trekking saddle is divided into 3 zones. At the front is a flat sports zone, ideal for a more dynamic, forward-stretched riding style. Behind it there is a soft comfort zone, which effectively relieves the buttocks. At the very rear is a dense padded zone, with which it can be ridden particularly well upright and without fatigue.Thanks to the 3 zones, it is easy to switch between different positions on the bike and always feel comfortable at the same time.The padding of this trekking saddle consists of cold foam. This has the advantages that it is permanently elastic and also very light. In addition, this material conducts heat very well. To be clear, this means that the saddle cover cools down quickly even after intense sunlight. So you don't have to worry about a hot saddle even on warm summer days.By the way, the rails of the "Volare Trekking XL" is made of chromium-molybdenum steel (CrMo rails). It is a unisex model on which both men and women can sit comfortably.All in all, CONTEC offers this trekking saddle to meets various requirements at the same time. It makes it easy to go on bicycle tours.
