

CONTEC Derailleur cable outer casing "Shift"

black

Price: €23.99

Precise shifting with derailleur and internal gear hubs Whether MTB, cyclocross bike, road bike or tourer - only through properly tuned shifting components comes so right riding fun. An important prerequisite for this are intact derailleur cables and derailleur cable outer casings. The CONTEC derailleur cable outer casing "Shift" with a diameter of 4mm is supplied in the practical box with a 40m roll. The box finds space under the workbench or on the shelf and the outer sheath can simply be pulled out and cut to the desired length - without twisting. The CONTEC derailleur cable outer sleeve "Shift" is ideally combined with the CONTEC stop sleeve "Shift". This is simply plugged onto the ends of the cut-to-length derailleur cable outer sleeve. The outer casing is covered with a durable and elastic plastic layer and allows thanks to parallel to the direction of pull running, embedded wire cores particularly precise switching, as the compression of the outer casing is thus prevented. The derailleur cable outer sleeve "Shift" is suitable for all derailleur and internal gear hub cables.

Basic Data

Supplier Article Number:	IGOC4DB
EAN	4250311341064
MSRP:	€69.95
Fedas-Code	160354
SB-Article	Yes
Bidex-Code	202160
DST-Code	2R08
Brand/Supplier	CONTEC
Unit of measure:	PACKAGE
Weight	1.434 kg

Technical Data

Design	Schaltung
Diameter	4 mm
Main colour	black
Outer casing	40000 mm
Type	Außenhülle
Variant	Article
