

CONTEC Armoured Cabel Lock "EcoLoc"

Ø 25mm, 110cm long, 965g, security level: 7

RRP: €22.95

Strong lock, strong protection!The CONTEC armoured cable lock "EcoLoc" is a first-class guard whose hard steel cannot be cracked. It reliably protects the bicycle from theft. The steel construction of this bicycle lock protects bikes twice: On the one hand, the steel cable, which scores with high flexibility. On the other hand, the hardened steel joints provide efficient protection for the cable.The whole thing is covered by a layer of vinyl. The durable casing is weather-resistant and protects against corrosion.In some bicycle locks, the locking device is a weak point in the system. Not so with the "EcoLoc" by CONTEC: The secure armoured cable lock comes with a "BumpBlock M-Zylinder". This precision locking cylinder is housed in a capsule made of sturdy steel. Attempts to open it by drilling, pulling or striking do not have any effect."EcoLoc" is therefore the bicycle lock for those who love their bike and want to keep it away from thieves. Stable, secure and equipped with 2 keys in case one is lost.

Basic Data

Supplier Article Number:	***
