

CONTEC Pedal "Spatula II"

black

Price: €64.99

Sensible design & best performance Deep drops, wide jumps, through water, mud and up steep inclines - while maintaining control: When it comes to technically demanding freeriding, great forces act on the pedals in particular. The CONTEC MTB/freeride pedal "Spatula II" is perfect for anyone who doesn't want to compromise on the quality, ergonomics and reliability of their components. The "Spatula II" consists of a one-piece combination of aluminum cage and aluminum body, which is very torsion-resistant and robust. Thanks to the CNC-milled axles with the standard 9/16" thread made of particularly strong CrMo steel, the pedal can withstand even the hardeners and can be easily mounted using an open-end wrench. The replaceable CrMo pins on the large treads ensure the best grip. They guarantee ideal grip even in mud and wet conditions and can be replaced as required. The sealed industrial bearings ensure maximum ease of movement and durability and counteract wear caused by the ingress of moisture and dirt. Thanks to its high-quality workmanship, low weight of just 340 g and practical design, the CONTEC MTB/freeride pedal "Spatula II" is ideally suited to the needs of freeriders. The perfect pedal for freeriders.

Basic Data

Supplier Article Number:	WE- B252 BK
EAN	4250311334219
MSRP:	€129.95
Bidex-Code	202310
SB-Article	Yes
Fedas-Code	160373
DST-Code	2N02
Brand/Supplier	CONTEC
Unit of measure:	PAIR
Weight	0.32 kg

Technical Data

Bearing type	sealed bearing
Design	freeride/downhill
Frame material	aluminium
Housing material	aluminium
