

CONTEC Pedal "2Black"

black

RRP: €34.95

Unbeatable in the terrainEspecially for steep and longer climbs with an MTB on the trail, in the bike park or for longer rides in rough terrain, a larger contact area on the pedal ensures improved ergonomics, more safety and more efficient power transmission. The CONTEC platform pedal "2Black" is perfectly adapted to these requirements: The one-piece aluminium body offers a generous contact area and torsional stiffness under high loads with a total weight of both pedals of only 420 g.The robust axle made of high-quality CrMo steel with a typical 9/16" thread also contributes to the durability and stability of the pedal. This steel alloy is characterised by robustness and break resistance, which is an added benefit in terms of safety and reliability due to the high continuous loads in mountain bike sports. Smooth-running ball bearings ensure supple rotation and great forward motion.The CONTEC platform pedal "2Black" can also be adapted to personal needs on and off the trail by means of removable reflectors and replaceable pins (R-pins) and can be used in the long term without having to compromise. Lost or worn pins can easily be replaced with new single or different coloured R pins, which are screwed into the intended threads with the supplied spanner.The platform pedal "2Black" meets the high demands and requirements of enthusiastic mountain bikers by using high-quality and robust materials and sensible features. It is an ideal upgrade for any MTB.

Basic Data

Supplier Article Number:	WE-B087B
EAN	4250311334103
MSRP:	€34.95
Bidex-Code	202310
SB-Article	Yes
Fedas-Code	160373
DST-Code	2N02
Brand/Supplier	CONTEC
Unit of measure:	PAIR
Weight	0.472 kg

Technical Data

Bearing type	ball bearing
Design	freeride/downhill
Frame material	aluminium
Housing material	aluminium
Main colour	black
Thread	9/16
Variant	Article
