

CONTEC Damper Pump "ShockRocket"

max. 28 bar / 400 psi

RRP: €35.95

Precision for the suspensionIn order to precisely adjust the air suspension of a mountain bike to the weight of the rider and the riding style, a special pump with a high pressure range is required. The suspension pump "ShockRocket" does exactly this with a max. air pressure of 28 bar (400 psi). With it, the bike suspension is perfectly adjusted, so that its full potential is used.The pump makes sensitive fine tuning possible quite simply with pressure regulation via the air release button. Furthermore, no pressure is lost due to the 2-stage system of the pump's Schrader valve. The pressure gauge shows very precisely how much pressure is present in the air suspension elements."ShockRocket" is made of aluminium and plastic and has a digital display. Because the hose of the pump can be rotated by 360°, it also has a small packing dimension. "ShockRocket" is available in silver and black. The pump weighs 240 g, making it the perfect tool for mountain bike riders who like to adjust the suspension of their bike precisely. This way, you're well prepared on the trail.

Basic Data

Supplier Article Number:	SP-003AG
EAN	4250311340876
MSRP:	€35.95
Fedas-Code	160655
SB-Article	Yes
DST-Code	2I02
Bidex-Code	301650
Brand/Supplier	CONTEC
Unit of measure:	PIECE
Weight	0.186 kg

Technical Data

Design	shock pump
Features	pressure gauge , stable air button
Main colour	silver
Max. pressure	28.0 bar
Max. pressure	400.00 PSI
Range of application	universal
Secondary colour	black
Valve type	Schrader (AV)
Variant	Article
