

CONTEC Handlebar "Brut"

720mm long, Ø 31,8mm, backsweep 9°, upsweep 5°, rise 15mm (special item, bulk)

RRP €24.95

Sturdy, curved bicycle handlebars are forged from aluminium, as is the CONTEC MTB riser handlebar "Brut" in black. In order to achieve particularly favourable properties such as crack resistance, an ergonomic shape and a low intrinsic weight, the "Brut" riser bar is made of aluminium 6061. The material is additionally anodised and sandblasted to improve the surface quality. This MTB handlebar is characterised by its backsweep. By preventing overextension of the wrists, the cyclist can steer without stress. An ergonomic handlebar like the "Brut" riser bar thus prevents unpleasant carpal tunnel syndrome. Especially for demanding off-road riding, this backsweep handlebar is ideal. It is standardised according to the EN MTB STANDARD. The product is available with 25.4 mm Ø or 31.8 mm Ø depending on the stem clamp. Thanks to its robust construction and its well thought out shape, this backsweep bicycle handlebar guarantees a carefree and comfortable riding experience.

Basic Data

Supplier Article Number:	JD-MTB463A
MSRP:	€24.95
Bidex-Code	205010
SB-Article	Yes
