

SRAM Rear Derailleur "Rival XPLR eTap AXS"

for 10 - 36/44 teeth cassette sprockets

Price: €196.00

Powerful on and off-road Powerful bikers need equally powerful components: The SRAM "Rival XPLR eTap AXS" rear derailleur for your gravel bike is the entry-level model in the "XPLR" series. It electronically shifts the twelve gears of the matching cassette with a maximum of 44 teeth with ease - whether on asphalt roads or single trails. The chain remains smooth and where it belongs. Compatible with the AXS app, you can customize the shifting behavior and evaluate your shifting actions from the last tour. Thanks to X-Sync technology, dirt and mud don't bother the derailleur pulleys. They shine with a long service life and are suitable for as many on- and off-road adventures as possible.

Basic Data

Supplier Article Number:	00.7518.159.000
EAN	710845868993
