ROCKSHOX Vario Seatpost "Reverb AXS XPLR"

50mm adjustment range, 400mm long

RRP: €633.00

For ups and downs without sacrificing performanceYou don't just experience ups and downs on your MTBs - your gravel bike also offers adventures between steep climbs and enduring speed sections. The ROCKSHOX "Reverb AXS XPLR" dropper post can be individually adjusted via the controller on the cockpit to ensure the right seat height at all times.The dropper post does not require any cables and is controlled wirelessly. This advance definitely promises to make installation, assembly and servicing easier. There is also no loss of power when lowering and extending. Thanks to "AXS" technology, the dropper post is compatible with all other "AXS"-enabled parts and can be personalized via the app of the same name.The "Reverb AXS XPLR" has a brand new Air-Only Insides with built-in ActiveRide damping. The new ActiveRide is rock-solid when fully extended for maximum efficiency and absorbs vibrations when you really let it rip.Maintenance of the "Reverb AXS XPLR" is done in no time at all. The post is equipped with a vent valve, so you don't even have to dismantle the post to bleed the air. Dust and waterproof according to protection class IP69K.
