

VICTORIA Electric trekking bike "CYSALO 13" Mod. 23

deep, 28", nova petrol, 7-speed SHIMANO "Nexus" RBN, 56 cm / L

Price: €1,669.95

Attention pleasure tourers! The "CYSALO 13" not only offers the proven, low and wide entry, which makes getting on the bike particularly comfortable. It is also equipped with the slightly more torquy Bosch "Active Line Plus" drive. What's more, the "PowerPack 500" Battery integrated in the Carrier does not need to be recharged after every short trip. Conversely, this also means that Dropouts can also be a little longer. The low-maintenance 7-speed "Nexus" gear hub rounds off the drive package. It has a backpedal function. The "CYSALO 13" is therefore equipped with three brakes. This is because the tried-and-tested hydraulic "HS11" Rim Brake from Magura brakes on both rims. Comfort - the keyword that characterizes the VICTORIA brand - is definitely not neglected on the "CYSALO". Thanks to the Suspension Fork, suspended Seatposts, rearward offset Comfort Handlebars and ergonomic Grips, it relieves as much strain as possible. The pedelec is road-ready thanks to the sturdy aluminum Fenders, which keep out dirt and rainwater, as well as the Contec lights. With a solid 30 lux, the Front Light illuminates the way home.
