

CONWAY MTB full suspension "RLC FS 6.9" Mod. 23

full suspension, 29", topaz metallic fade / red, 12-speed SHIMANO "XT", 51 cm / L

RRP €3,499.95

The "RLC FS 6.9" comes up with more travel - and thus qualifies as a true marathon and downcountry bike. All bumps and uneven surfaces that come in front of the CONWAY "RLC FS 6.9" on cross-country or marathon trails are smoothed out with 120mm. To ensure full power transmission, the full-carbon race full suspension is light and laterally stiff. Your drive is provided by the SHIMANO "Deore XT Shadow Plus" shifting system with its 12 gears. From the same family come the hydraulic disc brakes. The lug tread of the tire combination of SCHWALBE, front "Racing Ray" and rear "Racing Ralph" in Evo quality, 60mm width with Addix Compound, gives you enough grip on loose ground. The DT SWISS "X 1900 Spline" wheels contribute to the lateral stiffness and plenty of drive power. The genes of the race full suspension bike come from the CONWAY siblings "WME" and "RLC", its handling is correspondingly sporty, the seating position nevertheless suitable for long distances. The "RLC FS" series is also prepared for the FOX "Livevalve" suspension systems.
