

CONTEC Vario Seatpost "Nara Dropair DLX"

Ø 34.9 mm, 402 mm long, 80 mm adjustment range

Price: €119.99

Drop & air suspension The best of both worlds: The "Nara Drop Air DLX" is a Vario suspension seatpost that combines the safety of a dropper seatpost with the comfort of air suspension. This means that it will appeal to you if you prefer a low saddle height when getting on and off the bike, but you want to be able to absorb the shocks of uneven ground such as cobblestones or forest paths at full speed and do not want to do without an ergonomically correct seat height. You can easily adjust the saddle height using a Shifter on the Handlebar. Pressing the lever lowers or raises the saddle continuously. The extra Teflon coating protects the seat post from damage to the paintwork and also makes it easier to adjust the saddle height. Maximum permissible rider weight: 120 kg.
