SRAM Disc Brake "Force AXS"

right, rear brake with 1800mm line, for flat mount, mounting package

RRP: €255.00

Efficient shifting & powerful brakesStrong braking power meets precise shifting - the SRAM "Force AXS" shifting and Brake Unit is easy to operate on your gravel bike. With the eTap shifters, shifting is virtually impossible. One blip on each side can be connected to the shifters so that you can also shift gears on the top bar or Aerobar. This connection is made via a cable, but the shifters themselves remain wireless.The shifters are configured this way by default: The rear derailleur shifts into a heavier gear via the right-hand Shift Lever and into a lighter gear via the left-hand one. However, you can also use the "AXS" app to customize the shifting behavior and switch assignment. You can also view your shifting behavior in the app.The brake pads are made from an organic composite material, which is why the brakes are significantly quieter compared to metal pads. The DOT 5.1 Brake Fluid enables comparatively longer maintenance intervals with this hydraulic Brake Unit. The brake rotors and a flat-mount adapter are not included in the scope of delivery.

Basic Data

Supplier Article Number:	.
MSRP:	€255.00
Bidex-Code	203020
DST-Code	2Q02
SB-Article	No
Fedas-Code	160401
Brand/Supplier	SRAM
Unit of measure:	PIECE
Weight	0.474 kg

Technical Data

Attachment	Flat Mount (FM)
Brake type	Scheibenbremse
Features	with shift lever
Main colour	black
Range of application	Road , triathlon
Variant	Article
Version	hydraulic
