Smart thought, smart done: the "Cairon SUV FS 4.7" from CONWAY starts the new cycling season with a fully networked makeover. Equipped with the Bosch Smart System, all components can communicate with each other and keep you informed of all tour details. Once the E-Bike Flow app has been set up, it connects to your bike via Bluetooth and you're ready to go. The powerful Bosch "Performance CX" drive, which is powered by the high-capacity 625 Wh "PowerTube" battery, is joined on the "Cairon SUV FS 4.7" by complete frame suspension for even greater comfort. The look remains clean, as the Battery disappears completely into the down tube, where it can remain for charging. The fact that the E-SUV really proves itself on any terrain is demonstrated by the tires: the 60 mm wide "Johnny Watts" from Schwalbe have a robust tread pattern and cope well with forest paths and gravel tracks. Suspension Fork plus Damper with 120 mm travel not only cope with this terrain, they also ensure that you glide confidently through potholes and tree roots. Shifters are 10-speed Shimano "Deore". The "Cairon SUV FS 4.7" is suitable for touring thanks to the carrier fastenings, which can be used to attach panniers or baskets for short trips to the lake. Fenders and the LED Light make the bike fit for the way home through the city. The daylight-bright 80 lux Front Light illuminates the way safely. The rear lights impress with their stop light function. If the hydraulic Disc Brakes have to react spontaneously, cyclists behind can react better.
