

CONTEC Cassette rear hub "Eroq DB"

8-/9-/10-/11-speed Shimano HG-M, MTB Freewheel Body (34.9 mm), mounting width 135 mm

RRP: €79.95

A hub is like the heart of a wheel—it forms the stable core that ensures a smooth riding experience. A rear hub also has the additional task of securely holding the cassette in place to promote both optimal power transfer from the Chain and seamless shifting. Our CONTEC EROQ cassette rear hub is exceptionally sturdy and can therefore withstand the high torque and heavy weight of an e-bike. The hub features an aluminum body with a hollow axle and is attached to your bike using a compatible QR skewer (e.g., CONTEC EROQ.R Rear). The compatible QR skewer is included with the hub. The standard mounting width of the CONTEC EROQ rear cassette hub is 135 mm. It is also compatible with 6-bolt brake rotors and has 32 spoke holes. The EROQ rear hub features a sturdy Shimano HG Freewheel Body made of durable steel with high-quality ball bearings. The ratchet freewheel system, with 27 teeth and 3 Paws, ensures rapid interaction between the freewheel and the hub body, so that your pedaling effort is quickly converted into forward momentum.

Basic Data

Supplier Article Number:	RTP HG DB
EAN	4251971146341
MSRP:	€79.95
Fedas-Code	160452
SB-Article	No
Bidex-Code	204030
DST-Code	2P04
Brand/Supplier	CONTEC
Unit of measure:	PIECE
Weight	0.437 kg

Technical Data

Axle	hollow axle 9 mm
Bearing type	ball bearing
