

VICTORIA Electric trekking bike "Manoc 5" (#1)

wave, 28", illusion green, ENVIOLLO "HD" stepless, 54 cm / L

RRP €5,199.00

The golden mean of the MANOC premium trekking series with hub gears is the MANOC 5. With a permissible total weight of 170 kg, the MANOC 5 is the ideal everyday and touring companion and, thanks to the MIK pannier rack system, can firmly attach panniers and the like without them slipping during the ride. As with all new Victoria developments, the batteries integrated in the down tube can be removed from the top, making it unnecessary to remove them from the bottom. However, in view of the large capacity and the associated battery weight, we recommend charging at the MANOC instead, as it is simply more convenient. The smart Bosch system delivers the maximum of what is currently possible with the "Performance CX" drives and the highest-capacity "PowerTube 750" Battery. Additional information that the "Kiox 300" color display does not provide can be transmitted to your smartphone via the eFlow Bike app. This information can be used by other apps for navigation, for example. Thanks to the continuously variable Enviolo hub gears and the Straps, maintenance work is reduced to an absolute minimum. The air-sprung Fork with its 80 mm suspension travel also offers a great deal of comfort and absorbs the bumps in the road from the wide yet low rolling resistance tires.
