What will it be? A summery crossing of the Alps to Lake Garda or would you prefer to explore the Mecklenburg Lake District? There are many impressive experiences on two wheels for which you need the right vehicle. Topographically demanding routes? From paved surfaces to moderate terrain and back onto the road? If you don't know what to expect on the road, you can at least rely on your "UTILYON". Rough tracks, adverse conditions and the most remote destinations are practically in its cradle. The "UTILYON 6" is designed as a complete touring bike. The range of the 1x11 "XT" derailleur gear system offers a perfect gear ratio of 455% for steep climbs (1.77 m gear range in first gear) and long descents (8.06 m gear range in eleventh gear). Your own efforts are garnished with the support of the 85 Nm torque of the Bosch "Performance CX" drive, which thanks to the two batteries and 1,475 watt hours of capacity will never run out of breath.
