

CONTEC Rearview Mirror "E-View King XS"

left (special item, loose)

RRP €24.95

The king of rearview mirrors: Our CONTEC E-View King XS gives you maximum visibility. Thanks to the large mirror, you always have the traffic behind you in view and can concentrate on your ride in a relaxed way. Areas that were previously blind spots are now finally in your field of vision without having to take your eyes off the road in front of you. With the swivelling function, you can adjust the E-View King XS to suit you and your riding position. The wider arm made of nylon with fibreglass offers a lot of stability so that the rear-view mirror does not wobble even on uneven paths. All our Evo models are manufactured with a Dazz lens made of special safety glass, which reduces distracting reflections by 75%. The E-View King XS is attached with an inner handlebar clamp and is available in left and right-hand versions. Before mounting, make sure that your handlebar inner diameter is no larger than 16 mm.

Basic Data
