

CONTEC Rearview Mirror "E-View King"

left (special item, loose)

RRP: €29.95

The king of Rearview Mirrors: The CONTEC E-View King gives you maximum visibility and impresses with its special features. The large wide-angle mirror has an included dimming function that dims the high beam from behind - so you can still concentrate on your ride even in the brightest Front Light of other road users. Attention e-bike fans: Thanks to the joint on the clamps and the offset to the rear, the E-View King can also be mounted on bikes with e-bike displays (e.g. Bosch Intuvia). With the swivel function, you can then adjust this Rearview Mirror to suit you and your riding position. Areas that were previously blind spots are now finally in your field of vision without you having to take your eyes off the road in front of you. The 12.6 cm long arm made of nylon with glass fiber content offers a lot of stability so that the Rearview Mirror does not wobble even on uneven roads. All our Evo models are manufactured with a Dazz lens made of special safety glass, which reduces distracting reflections by 75%.The E-View King is suitable for all standard Handlebars with a diameter of 22.2 mm.The CONTEC E-View King was named the price/performance winner* in the rear-view mirror test in the 07-2025 issue of the magazine "ElektroRad"!*In the test: Ten Rearview Mirrors, including one price/performance winner and one recommendation.

Basic Data

Supplier Article Number:	SAMPLE ME015-B LEFT
MSRP:	€29.95
SB-Article	Yes
Fedas-Code	160210
