

SRAM Rear Derailleur "Force XPLR eTap AXS"

for sprocket cassettes 10 - 36/44 teeth, unicorn gray, assembly packaging

Price: €200.01

Smooth chain operation through steep terrain Put the gas down on asphalt roads, climb the next hill efficiently - the SRAM "Force XPLR eTap AXS" 1x rear derailleurs are specially designed for gravel use. Together with the matching "XPLR" cassette up to 44 teeth, you have a good range for steep terrain. However, the "Force XPLR" rear derailleur and a 36-tooth cassette are just as good a team on your road bike. The Orbit technology once again underlines the gravel application range. At full speed, the silicone fluid damper elegantly ensures that the chain runs smoothly and safely. The cable-free design ensures a tidy appearance and saves you tedious work. Compatible with the "AXS" app, you can customize the shifting behavior and evaluate your shifting actions from the last tour. Thanks to X-Sync technology, dirt and mud don't bother the derailleur pulleys. They boast a long service life and are ideal for as many on- and off-road adventures as possible. The battery for the rear derailleurs is not included in the scope of delivery.

Basic Data

Supplier Article Number:	00.7518.167.000
MSRP:	€390.00
Bidex-Code	202110
