

CONTEC Water Bottle "Rivers Twist XS Set"

450 ml

RRP: €39.95

What do you get when you combine our Rivers water bottles with Fidlock technology? Rivers with a twist! The new Special Edition Water Bottle can literally be detached from its Holder in the blink of an eye and provides an even faster supply of drinking water. The 450 ml version is compact enough to be ideally mounted on (e-)MTBs and full-suspension bikes, which normally have little space for accessories due to their frame shape. So you can refresh yourself quickly and continue your adventure straight away.The CONTEC Rivers Twist Set includes a water bottle, a Fidlock connector and a bike base.The bottle body holds up to 450 ml of liquid and is BPA-free, dishwasher-safe (up to 50°C) and, of course, odorless and tasteless. Its ergonomic Bottle Bite is made of TPE (thermoplastic Elastomer) and is leak-proof. The Cover is equipped with a self-closing membrane and an optional dirt cap.The Fidlock Connector and the Bike Base are made of glass fiber reinforced nylon and therefore add only a few grams to the total weight of your bike.What is Fidlock?Fidlock technology makes it possible to dispense with a conventional Bottle Cage and offers a space-saving alternative that allows you to grab the associated Water Bottle even faster. The flat Fidlock connector is mounted on the bottle cage eyelets of your bike like a standard Holder. The counterpart is already integrated in the Rivers Twist water bottle. This is because both parts of the system are connected by magnets. If you want to detach the water bottle from the connector, all you have to do is turn the bottle to the right like a clock hand. When reconnecting, the magnets of both Fidlock system parts ensure a quick, firm hold.
