

3T Handlebar "Aeroghiahia LTD"

loose, grip width 44 cm

RRP: 375,00 €

Aerodynamic & ergonomicThe 3T "Aeroghiaia" was designed for gravel and all-road riding. It offers you the ideal combination of speed, control and comfort. The flattened top link gives the wind no chance to slow you down and your hands a wide contact surface. All cables can be routed internally, which ensures even less drag and tidies up the cockpit. The "Aeroghiaia" is also compatible with SHIMANO's Di2 drivetrain. The strong flare has two advantages: It improves ergonomics on the bike and gives you full control on rough terrain. The reach is 89 mm and the drops are 110 mm deep.
