

AXA Folding Lock "Fold"

100cm long, folded size: 22 x 6 x 2,5cm, 950g

RRP 93,95 €

Security that folds and clicksThe "Fold" from AXA is a stylishly designed foldable locks. It is supplied with a practical Bracket. This can be mounted on the Bottle Cage or alternatively attached to the frame using the 2 mounting straps supplied. As you do not have to slide the lock out of the Bracket, it is suitable for all frames. Thanks to the revolutionary locking mechanism, the Folding Lock sits firmly in its Bracket and does not rattle during the ride. With its flexible joints, the bike lock is easy to handle. Made of hardened steel, it resists attacks by saws, cutting or breaking. The "Fold" has a practical click-in function. You simply slide the Connector into a recess on the side. The Lock engages with a clearly audible click. The keys can now be removed and the bike is locked. The soft coating of the foldable locks protects the bike frame from scratches. The AXA lock has a symmetrical key, which is very practical when opening and locking, especially in the dark. Furthermore, a dust cap on the lock protects the cylinder from moisture and dirt. This ensures the longevity of the lock.
