

# CICLOSPORT Bike Computer "Protos 113"

**blue**

## RRP: 24,99 €

Everything at a glance, even in the darkThe "Protos 113" from CICLOSPORT offers all data at a glance on the four-line display in a purist and individually adjustable design. The display can be permanently illuminated at the touch of a button so that year-round commuters have everything in view in the mornings and evenings, even in fall and winter. Display lines two and four can be set individually. You can choose between maximum or average speed, riding time or total riding time and calorie consumption. The "Protos 113" thus concentrates on the individual essentials and reliably displays the data, which comes via cables from the Front Wheel. Only about once a year, according to CICLOSPORT, does the battery display indicate that it is time to change the battery again.
