

Continental Tube "Compact 20 Wide"

Schrader valve 34mm

RRP 8,95 €

CONTINENTAL Compact 20 WideA bike without tubes is possible, but not rideable. That's why you should always have a spare tube with you when you're out and about. Please make sure you have the right size! The correct size is usually displayed on the side of the tire. The ETRTO measurement is commonly used. Its first two numbers indicate the correct tire width. The following digits indicate the inner diameter of the tire. For the Compact 20 Wide, this is 20". For the valve and the correct length, it is best to use the old tube as a guide: the Schrader AV valve on the Compact 20 Wide is 34 mm.
