

fi'zi:k Handlebar Tape "Vento Solocush Tacky (Ridefeel 2,7 mm Tacky)"

orange fluo

RRP: 44,90 €

High performance for racersThe demands are high, power and performance should fit perfectly. This is exactly why FIZIK created its "Vento Solocush Tacky" handlebar tapes. The name "Vento" means that this article was developed for racing and ambitious racing cyclists. As it is extra long, this handlebar tape, which is available in pairs, also fits around aero handlebars.Of course, the main aim here is to keep the weight as low as possible. A 2.7 mm thick layer of pure EVA foam plays its part in this, making this sporty handlebar tape very light at 34.3 grams. This also results in a high level of comfort, which is a great advantage, especially during longer rides. Finally, this road bike handlebar tape offers ultimate control: a non-slip tacky surface with a textured finish provides very good grip in all conditions. FIZIK offers this grip tape in many attractive paints.For those looking for high performance, the "Vento Solocush Tacky" is just right. The design clearly appeals to racing cyclists.

Datos maestros
