

FULCRUM Wheel Set "Racing 4"

HG 8-11

RRP 439,00 €

FULCRUM "Racing 4" wheel sets Performance + versatility = maximum satisfaction. FULCRUM "Racing 4" promises a lot and gives even more: a Wheel that you have to put to the test. The "Racing 4" is the signature trump card in your hand because it is able to give that little bit extra, no matter what the terrain in front of it looks like. Its lightweight medium-high rim profile makes it a continuous discovery with an enviable approach and eyes focused on performance. The similarities with the models of a higher class running on the bikes of champions are no coincidence: the R&D department has drawn on its experience in developing such extreme rims to create a package for other demands that does nothing to hide the outstanding pedigree from which they descend. The 35mm profile was and is a successful foreshadowing; as it can show a successful balance between aesthetics and performance. Their medium-height rim profile makes a difference on the flat when riding at cruising speed, without penalizing on the climbs, where it remains lively and agile on reaccelerations.
