

GAADI Tube

Dunlop valve (DV), 40mm

RRP: 11,99 €

Everything has an end, only this tube has 2 Never remove a Wheel again when changing the inner tube: The revolutionary GAADI tube fulfills this wish. This is possible because it does not form a closed circle like other bicycle inner tubes, but is designed to be open. Thanks to its 2 ends, it is simply inserted into the tire all the way around. Another advantage is that GAADI has placed the valve in the first third of the tube. This makes threading even easier. What's more, you hardly need any tools for this type of installation. A small, lightweight tire levers is all you need.GAADI tubes are made of durable butyl and are just as light as conventional bicycle tubes. The new tubes are available in sizes from 20 to 29". They are available with AV, DV and SV valves.
