

GAADI Tube

DV, 40mm

RRP: 10,90 €

The tube with 2 endsEverything has an end and this tube has 2. The GAADI tube is a very special tube. It has 2 ends. Why? Well, changing an inner tube is not always easy. Depending on the bike, it can be more or less complicated to change a tube. This is where the GAADI tube comes to the rescue. Thanks to its 2 ends, the Wheel does not have to be completely removed. This disassembly is no problem on a bike with a QR. However, on some axles, the Axle is firmly screw fitted. Here you need a wrench, which you usually don't have to hand in an emergency. The GAADI tube is also a real problem solver for e-bikes with a rear hub motor. Because here too, removing the rear wheel is difficult. Here's how it works: cut the broken Tube and pull it out of the Tires. Then place the GAADI tube in the tire. The ends should be touching, not too far apart, but not overlapping either. Then inflate the tube and off you go on your bike ride!

Datos maestros

Número de artículo del proveedor:	510317025111
UVP	10,90 €
Bidex-Code	204050
SB-Artículo	No
DST-Code	2A01
Fedas-Code	160477
Marca/Proveedor	GAADI
Unidad de medida:	PIECE
Weight	0.172 kg

Datos técnicos

Anchura pulgadas	1 1/2 x 1 3/8 , 1 1/4 , 1 1/4 x 1 3/8 , 1 3/8 , 1 3/8 x 1 1/2
Artículo	Article
Color principal	Negro
ETRTO	32-584 , 32-590 , 32-597 , 37-584 , 37-590
Longitud válvula	40.0 mm
Medida de Ruedas	26 "
Tipo de válvula	Dunlop (DV)
