

GAADI Tube

DV, 40mm

RRP: 11,99 €

The revolutionary solution for puncturesThe company GAADI from Mönchengladbach has come up with something for MTBs riders who don't want to waste their time repairing punctures but want to have fun on trails and off-road.Revolutionary and patented: a Tube that can be changed without removing the wheels. The special feature of the GAADI tube is its 2 ends, which meet when inflated in the tire, creating a seamless connection.GAADI tubes not only save time, but also problems. Because even if you don't have the right tools for removing the front or rear wheels, the Tube can be fitted. It is not necessary to remove the Wheel. The tire only needs to be removed from the rims on one side of the Wheel.The rest is done as usual: insert the GAADI tube, insert the valve into the valve hole and secure with the nut. Then lightly pump the tube and pull the casing back onto the rim. Now finish inflating and you're ready to rock the trails again! Your fellow riders will be amazed at how quickly you are ready to go again.The tube is available in all common sizes between 20" and 29" and with all valve types.Fast, simple and universal: GAADI has revisited the issue of punctures with its tubes and made "flat tire" repairs easier for everyone with the innovative idea of splitting the tube.

Datos maestros

Número de artículo del proveedor:	510317028111
EAN	8593375443883
UVP	11,99 €
Bidex-Code	204050
SB-Artículo	No
DST-Code	2A01
Fedas-Code	160477
Marca/Proveedor	GAADI
Unidad de medida:	PIECE
Weight	0.219 kg

Datos técnicos

Anchura pulgadas	1.50 , 1.75
Artículo	Article
Color principal	Negro
ETRTO	40-584 , 47-584 , 47-597
Longitud válvula	40.0 mm
Medida de Ruedas	26 " , 27,5 "
Tipo de válvula	Dunlop (DV)
