

G-FORM Elbow Protector "Pro-X"

size L (biceps: 34,5-37cm / forearm: 24-26,5cm)

Price: 29,79 €

Lightweight, flexible and reliable. Inconspicuous in the best sense of the word: the "Pro X" elbow pads fit well, are lightweight and breathable. Instead of foam or hard plastic, G-FORM uses a soft and flexible RPT pad for protection. RPT stands for "Reaction Protection Technology". The material hardens abruptly on impact, the higher the impact, the harder the pads. Immediately after hardening, the Pads become flexible again for maximum freedom of movement when continuing to ride. Thanks to the moisture-wicking compression fabric (with sun protection factor 50+), the elbow pads, which are available in five sizes, are comfortable to wear and fit perfectly. What's more, they are completely non-slip thanks to the silicone bands at the top and bottom. In addition to MTBs, the Knee Protectors are also suitable for water sports or skateboarding. They can also be washed in the washing machine for frequent use.
