

G-FORM Knee Protector "Pro-X"

size L (tight: 44,5-47cm / calf: 38-40,5cm)

Price: 34,20 €

Versatile knee protector For MTBs, whether BMX, cross country or downhill, the "Pro-X" Knee Protector from G-FORM combines the best protection with a high level of comfort. This is primarily due to the fact that the RPT (Reaction Protection Technology) Pads adapt softly and flexibly to the knee during normal use and then harden immediately in the truest sense of the word in the event of an impact. With features for which G-FORM holds a full 87 patents on construction and manufacture, the Knee Protectors can be pleasantly light and thin, making them easy to wear under shorts. Comfort is also provided by the moisture-wicking compression fabric, which also has a sun protection factor of 50+. Silicone bands at the top and bottom ensure a secure fit, as does the detailed gradation in six sizes. In addition to MTBs, the Knee Protectors are also suitable for water sports or skateboarding, for example, and last but not least for machine washing.
